

# Roadmap to a Successful Transformation

To keep up with today's flexible work environments and evolving business needs, enterprises need the latest technology to stay agile and competitive. But the journey to a successful transformation isn't always easy — especially without knowing exactly what lies ahead.

So how can your organization get started on the right path? Here's a look at how data can drive smoother migrations and deployments.

## Gauge Your Readiness

Is your organization ready for this kind of transformation? With complete visibility across the IT estate — from device and app performance to user behavior — leaders can assess whether the timing is right, if infrastructures and end users are ready to make this change, and if there are enough resources to get this project off the ground.

## Plan Your Route

Before starting your transformation journey, you'll need a map. By collecting and analyzing comprehensive endpoint data, IT can clearly see all the hardware and software across the organization, identify any compatibility roadblocks, determine which users are fit to migrate, and accurately estimate costs for right-sizing deployments.

## Hit the Road

When it's finally time to hit the switch, data will provide critical guideposts. Monitoring hardware and app performance, resource usage, and even end-user experience scores throughout the process will not only alert IT to potential bumps in the road, but also give teams the opportunity to get ahead of issues.

## Look Beyond the Horizon

The journey doesn't end with deployment. Continuous visibility of real-time and historical data can show IT and business leaders the real impact new technology has on digital experiences and productivity, as well as uncover areas to improve and ways to optimize.

Need more direction? Explore how Lakeside Software can help you steer your next transformation project.

### About Lakeside

Lakeside Software is how organizations with large, complex IT environments can finally get visibility across their entire digital estate and see how to do more with less. For far too long, IT teams have struggled to see what's going on in their dark estate — where costly inefficiencies, poor employee experiences, and unresolved problems hide. Only Lakeside lets you give everyone a better view, so they can see the hidden issues, see the smartest fixes, and see the biggest savings. That's why so many of the world's leading global brands rely on Lakeside. And it's how our customers see an average ROI of more than 250%. Lakeside. Give everyone a better view.™
